

VIRGINIA “GINNY” PARSONS

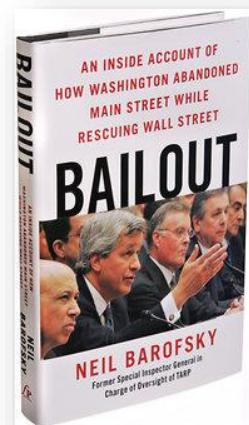

Virginia “Ginny” Parsons has been on the forefront of foreclosure defense since late 2009. As a paralegal with the ability to research case law since the 1970s, Ginny realized that something was dreadfully amiss when foreclosures started rolling in like a tsunami with no end in sight. She began to gather information and took it to several local attorneys before she met Gary Dubin, who understood the pieces of the puzzle she had begun to uncover.

Ginny’s network includes 90+ foreclosure defense paralegals, attorneys, law professors, securitization experts, bloggers and researchers sharing evidence and providing leading edge information to assist homeowners’ in their defense.

In 2011, Ginny started the DeadlyClear.com blog on Wordpress. “I wanted an easy way to disseminate the information and dumb it down for legislators, attorneys and judges so they could understand the impact the foreclosures were having on their constituents and communities,” said Parsons, “the depth of this information is like wrestling with a wild raccoon.” Her blog is known for her simplistic writing style and clever pictures to help tell the story. She incorporates her readers’ essays and comments. “DeadlyClear was created so homeowners could have a voice. It’s not about me – it’s about them – actually, all of us,” Ginny comments.

Parsons is an avid reader and says her library has several favorites including, [THE BIG SHORT](#) by Michael Lewis, [BULL BY THE HORNS](#) by Sheila Bair, [WOLF OF WALL STREET](#) by Jordan Belfort – and, of course, [BAILOUT](#) by Neil Barofsky. All of these are MUST reads. Ginny says if you haven’t read these books – you really don’t know what’s going on.

“How could a judge make an intelligent decision or an attorney make a decent argument – if he doesn’t understand how the new patented securitization system actually worked?”
